

COMMUTER SERVICES INTO FENCHURCH STREET

- In December 2007 Network Rail published the Greater Anglia Route Utilisation Strategy (RUS) which principally covered the routes into London Liverpool Street and Fenchurch Street.
- The RUS recommended that, in order to cope with the increased projected number of passengers travelling to London Fenchurch Street, by 2014 more peak morning and rush hour services should be strengthened to 12 carriages.
- C2C, the company operating trains into Fenchurch Street are running 8 carriage trains on many of their services in both morning and evening rush hour, resulting in overcrowding.
- I have made a log of passenger numbers standing on my morning and evening journey's to work from Pitsea Station to Fenchurch Street, as below:

08.04 PITSEA TO FENCHURCH STREET SERVICE FORMED OF 8 CARRIAGES

Stations	Pitsea	Basildon	Laindon	Barking	West Ham	Lime House	F/Street
